Dear Science Educators:

The purpose of this letter is to recommend Boomers, located in Dania Beach, as a partner in education.

Boomers has spearheaded the development of a science curriculum created by Broward County science teachers. This material has been used to allow students to enjoy the rides and park activities while obtaining an in-depth understanding of the physical science concepts.

Instructional opportunities of this kind are highly recommended because they motivate students to learn science and to take advantage of the opportunity to highlight the relevance of science concepts.

Please consider these field trip activities as a viable resource for science instruction. Please inquire before making final plans, since certain restrictions apply.

Sincerely,

Gladys A. Barrio, Ph.D., District Science Supervisor
Curriculum and Instruction (Science)
